From Lake Balaton 7,2 km, 11 min.

From Spa Hévíz 0 km, 0 min.

Energy efficiency

A family house in Hévíz with a solar system is for sale. The house has several bedrooms, a comfortable living room, a modern kitchen and a bathroom. With the help of the solar system, energy can be used efficiently, so maintenance costs can be reduced. The exclusive furniture and chandeliers are the luxury accessories that the owner has chosen for the house according to his own taste and style. These accessories do not include the purchase price of the property, but can be subject to negotiation. The property's entire electrical network has been renovated, thus ensuring a safe and reliable electrical supply. The plumbing and gas pipe system are also completely new, so you don't have to worry about possible leaks. The heating system is modern and efficient, so the property can be heated easily and economically. The wellness department located in the lower part of the family house provides a comfortable and private environment where all members of the family can enjoy the extra services together. Overall, thanks to the renovation, the entire infrastructure of the property has been updated, so you just have to use it.
